Carlo Carbonell

Junior Software Developer

Full Stack Software Developer, currently enhancing my skills in the likes of HTML, CSS, JS, Node.js, Express.js, and React. Looking to take my skills even further and apply them to an entry-level position in the real world.

React	Redux

PERSONAL PROJECTS

New York Times Search Engine (04/2021 - 04/2021)
- The website can be accessed at https://carlo1678.github.io/FrontEndProject/
- A multi-page Front End project that utilizes the New York Times API in order to search for News Articles (by Keyword), Movie Reviews (by Title), as well as Book Reviews (by Author Name).
- Developed after learning the basics of HTML, CSS, and pulling information from a public API.
- Created as a solo project using different aspects of Visual Studio Code and deployed on GitHub Pages.

Python RPG Game (03/2021 - 03/2021)
- The game can be accessed at https://github.com/carlo1678/python-rpg-game.
- A decision based terminal game where the choices made by the user impact the outcome of the game.
- Every section of the game prompts the user with a choice. A user can make a choice by entering a number and pressing enter.
- Each choice will will have a number in parenthesis(ex: (1)Attack), this means that the user needs to press that number and then press enter to invoke that action. Also incorporates error-handling.

DevKit (05/2021 - 05/2021)
- All applicable documentation for the website can be found at my GitHub repository at https://github.com/carlo1678/DevKit
- A multi-page study tool for developers created in collaboration with a few classmates from DigitalCrafts.
- Assigned as the Project Manager to oversee all of the data flow, and be responsible for the final outcome.
- Created as a group project using different aspects of Visual Studio Code and languages such as, HTML, CSS, JavaScript, PostgreSQL, Node, and Express.

AWARDS AND HONORS

U.S. Navy and Marine Corps Achievement Medal x2
